INC.

Make a Cross-Country Hike Right in Your Home or Office!

Outdoor jogging is fine if you have the time and the place to do it, but often it means great inconvenience to your sometimes "impossible" schedule.

Collins now provides you with your own private cross-country track along flat roads or up steep grades. Feel the invigorating strain of almost forgotten muscles. Daily you will feel the muscle tone return that once you prided yourself on. You can hike or jog for just 5 or 10 minutes a day. Take a "hike break" instead of a coffee break; your heart needs a chance too!

The Collins Execu-Tread gives rugged, "big Treadmill" versatility in a compact unit. A full 20% elevation and a maximum speed of 5 mph produces strenuous exercise for the most severe testing. Safety features, such as an elevation limiting device, low to the ground design for easy mounting and dismounting and the open back to prevent foot injuries make the Execu-Tread a first choice "pace setter".

Enjoy the Ease of Electric Lift and Adjustable Speed Control

The Collins Execu-Tread stores easily on end to take up a minimum of space and moves from place to place on the smooth-rolling elevating castors.

Choose the model that best suits your needs:

P-2050 Variable speed adjustable from .5 to 5 mph with Electric Lift to 20% elevation.

P-2051 Variable speed adjustable from .5 to 5 mph with no lift mechanism.

P-2052 Two speeds of 3.9 mph and 2.6 mph with Electric Lift to 20% elevation.

P-2053 Two speeds of 3.9 mph and 2.6 mph with no lift mechanism.

The finely finished control panel lends a contemporary contrast to the textured finish of the steel frame and aluminum motor housing. Panel mounted controls are angled for the convenience of the user and are clearly marked for quick identification. Optional handrails aid in sure-footed mounting and dismounting.
